DESIGN APPLICATIONS I KNOW

Adobe Photoshop
Adobe Illustrator
Adobe InDesign
Adobe Experience Design

APPLICATIONS I'M LEARNING

Adobe Muse
Sketch

Hello, I'm Kate!

I'm the **Design Resident** in the DALI Lab. I'm really excited to be part of such an innovative group and I am looking forward to sharing my UI/UX design knowledge and continuing to learn and grow. Come to me with any design-related questions!

My favorite aspect of design is the challenge of making complex information easy to understand and solving user-centered design problems.

When I am not designing, I am usually outdoors doing something active. I love hiking, biking, trail running, and most of all, cross country skiing. Let it snow!

About my page

For my design, I chose a simple color palette, with cool, soft colors and a clean, open layout to reflect my quiet personality and my personal design aesthetic.

The typeface is Calluna Sans, which is a humanist sans-serif, that is easy to read and has a friendly feel. The layout is a structured two column layout. I made use of very simple typographic shifts (color and size changes) to add structure to the information on the page and guide the reader through the different pieces of my bio.
